CSE 382
Exercise - Preferences

Submit a video that demonstrates that your project satisfies the requirements. Answer questions (see below) during your video.

- Use the project `Prefs` as the starting point.
- Add two new persistent user values (GUI elements, event handlers, and Preferences).
  - Date of birth - DatePicker, with an initial default of Jan 1, 2000
  - Experience - Slider, with a value in [0, 1].
- Run tests to verify that the values are persistent.
- Delete the app from the simulator and then rerun. Were the values persistent?
